

CARE OF THE BODY AFTER DEATH

ON ZOOM!

Cremation vs. burial, casket vs. urn are discussions customary in conventional funeral planning. This presentation will focus specifically on care of the body. How would we like our body arranged, how quickly must we be moved from our place of death? What is your music, what's your fragrance? Amy will help us ponder these questions and show us what is possible.

Amy Cunningham is a licensed funeral director and celebrant in Brooklyn who specializes in green burials, delayed transfers, home funerals, and witnessed cremation services in Green-Wood Cemetery's crematory chapels. Filled with kind advice on how to make funerals more affordable and sustainable, she was a reliable resource to news reporters throughout the novel coronavirus crisis, and most recently was named one of the 50 most fascinating people in Brooklyn.

TOUGH STUFF

Lunch hour education and conversation on special topics relating to aging, chronic illness, serious illness, death, dying, long-term care and more!
